

SOUL LIGHT

bring colour in your life

OUR VISION

In the years I spent in Indian villages I fell in love with their colors. Thus was born the desire to always be surrounded by this special energy and we have designed and started to produce mosaic lamps with our Indian friends. For some years now I have moved to Mauritius a small island in the Indian Ocean that has taken my heart away. Here, more than in any other place, I experience the power of colors on my psyche and on how much they can contribute to my serenity, from the wonderful green of the mountains and of the sugar cane fields to all the shades of blue of a paradisiacal sea. Surround yourself with colors and your life will be better!

Au cours des années passées dans les villages indiens, je suis tombé amoureux de leurs couleurs. Avec le temps, j'ai senti l'exigence d'être toujours entouré de cette énergie particulière, c'est comme ça que j'ai conçu et commencé à produire des lampes en mosaïque avec nos amis indiens. Depuis quelques années, je me suis installé à Maurice, une petite île de l'océan Indien qui m'a séduit. Ici, plus qu'ailleurs, je ressens le pouvoir des couleurs sur ma psyché et à quel point elles peuvent contribuer à ma sérénité, du vert merveilleux des montagnes et des champs de cannes à sucre à toutes les nuances de bleu d'une mer paradisiaque. Entourez-vous de couleurs et votre vie sera meilleure!

**Surround yourself with colors
and your life will be better!**

Simone Rossi Doria, owner

Negli anni trascorsi nei villaggi indiani mi sono innamorato dei loro colori. Così è nato il desiderio di essere sempre circondato da questa energia speciale e abbiamo ideato e iniziato a produrre con i nostri amici indiani le lampade mosaiccate da tavolo. Da un pò di anni mi sono trasferito a Mauritius una piccola isola nell'oceano indiano che mi ha rapito il cuore. Qui più che in ogni altro luogo sperimento la potenza dei colori sulla mia psiche e su quanto possono contribuire alla mia serenità, dal verde meraviglioso delle montagne e dei campi di canna da zucchero a tutte le sfumature del blu di un mare paradisiaco. Circondatevi di colori e la vostra vita sarà migliore!

The light blue color helps to sleep and fights lowering blood pressure as it has the power to relax. It conveys a sense of calmness and tranquillity; fixing it for a long time you get a quiet effect. Who loves light blue is a person very close to his loved ones.

The seven colors of the rainbow improve the balance and healing of the mind and body. Color plays a significant role in how people respond to time spent in a given space. For example, coloring lights in lamps and fabrics in a home greatly influence a person's perceptions in that space. Often, these sensation to color are linked to comfort and personal well-being

Once upon a time there was a very poor child called Harlequin. He lived with his mother in a small house, went to school and for carnival his teacher organized a party. He proposed to the school children to dress in mask. The children accepted the idea with enthusiasm, only Harlequin did not participate in this joy, because he knew that his mother was poor. The children were sorry to see Harlequin so sad,, so they decided to bring his mother a piece of cloth from their colorful costumes. Mom made a dress out of it. In the morning Harlequin found a dress of many beautiful and most celebrate mask. And all this thanks to help that his classmates had given him.

The word Mandala comes from Sanskrit and means circle, cycle. Mandala is an energy scheme that represents the entire cycle of existence. According to Buddhist and Hindu religions, this concentric figure conveys calm and serenity. In fact, it seems that dedicating oneself to coloring a Mandala leads to a feeling of peace with oneself and the surrounding world.

Depending on the three constitutional types identified by Ayurvedic science there are different therapeutic colors that bring benefits and cause different emotions.

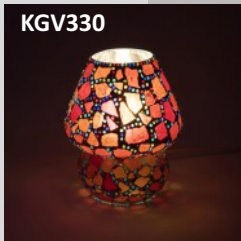

For those who have dominant Vata the colors most indicated are the warm ones, such a red, orange and yellow, integrated with soft and calming colors, such as white or soft shades of green and blue. Generally it is better to avoid too bright colors and to dark colors like gray or black, because they devitalize Vata.

Red is the first color of the rainbow and it is also thought to be the first color perceived by children, the first to be named by people. Red is the color of heart and love, of dynamism and vitality, of passion and sensuality, of authority and pride, of strength and security, of confidence in one's own ability.

The meaning of colors has been studied and used since ancient times. Color is energy that is absorbed by our body not only visually, but also physically, chemically and psychically. The range of electromagnetic waves, through their different frequencies, sends vibrational messages that arrive in the deepest districts of our being and stimulate both physical emotional responses.

Opposite attract themselves. The Eastern Tao symbol teaches it in its simple complexity, with two contrasting colors: black and white, Yig and Yang. The first is mysterious, like the night, the darkness. The second represents the day, the light, They are totalized and together they make the Universe go ahead, because there is no white without black, there is no good whitout evil. This theory applies to spirituality but also to more ephemeral things, such as beauty and even love.

Placed between Blue and Purple in the light spectrum, the Indigo colour is a symbol of spirituality and inner awakening. It increases the mood in case of melancholy or slight depression. Indigo also has a strong relaxing power and helps with meditative practices. The person who loves indigo can suffer sudden attacks of melancholy when he is constantly seeking harmony and affinity with the people around him. He can get out of these by picking up positive emotions and signals from the outside world.
